

Bayou Woods Elementary School MobyMax Guide for Parents

What is MobyMax?

MobyMax is a program used to help K-8 students close learning gaps and quickly catch up to grade level. Students who are already on grade level will be introduced to new topics to meet their learning velocity.

How do I get to MobyMax?

You can access MobyMax using the Clever Portal. You can find a link to the Clever Portal Guide For Parents on our website.

What does MobyMax look like?

After logging in, students will get to the Homepage.

1 Subject Library

This is where you'll find all the MobyMax learning subjects available to your child. From this screen, they can simply click on any of the icons to launch a new lesson or placement test.

2 Assignments

This is where you'll find any lessons that have already been assigned by the teacher. This is the best place to start — if you don't see anything here, it means you and your child are free to choose your own learning path from the library tab.

3 Fun & Games

Students can come here to cash in hard-earned game time, see the rewards they've won, and check in on their progress and growth.

There are all kinds of options in MobyMax, but which ones should your child be focusing on?

The first step is to check the Assignments tab — if your child's teacher has assigned one or more lessons, those should be the top priority.

Once assigned work is completed (or if your child didn't have any assignments to begin with), head back over to the library tab. You can't go wrong with any of these subjects, but some make for better starting points than others. When in doubt, we recommend choosing from this list:

- Math
- Language
- Foundational Reading
- Writing Workshop
- Science
- Social Studies

Starts with a placement test to ensure your child is working at the correct level
